

Security, Control, and Compliance In One Automated Solution

NEW!
VERSION
6.4

***Prism Patch Manager®** automatically secures Windows systems from software vulnerabilities — so you can comply with corporate standards and regulatory measures. It **delivers** the fast, accurate, proactive patch management needed to protect valuable information and IT systems from today's dynamic threat environment.*

Prism Patch Manager 6.4 features:

- Agent-based architecture to maximize network efficiency and protect devices when they disconnect from the network.
- Highly scalable architecture to patch all of your Windows systems, all of the time.
- Advanced automation technologies to streamline IT operations and conserve resources.
- Patented vulnerability assessment technology that delivers the most accurate threat detection available.
- One of the world's largest patch repositories with more than 15,000 tested OS and application patches.
- Comprehensive reporting that demonstrates software patch compliance with corporate standards and regulatory requirements.
- Automated patch level maintenance that sustains a patch baseline to support ongoing compliance efforts.
- Full support for Windows Vista™ and Microsoft® Office 2007.
- Advanced computer grouping based on Active Directory® structures to provide flexible, customizable patch deployments.
- Role-based administration that delegates tasks at different permission levels to ensure administrative security.

Prism Patch Manager 6.4 benefits:

- **Patch Notification**—Prism Patch Manager notifies you when new patches are available – and automatically locates and downloads them for you. You no longer need to waste valuable time trying to track down new patches.
- **Complete System Assessment**—Prism Patch Manager evaluates your systems to identify vulnerabilities so you'll always know which patches to install and which are missing. Our thorough pre-deployment testing means you get the most reliable patch management available.
- **Remote and Disconnected System Report**—Prism Patch Manager does the whole job, patching remote and disconnected systems as soon as they connect to the network.
- **Central Deployment**—Prism Patch Manager rolls out patches across your organization in one easy step. Deployment happens when you want it to, without wasting bandwidth or interrupting users.
- **Automated Patching**—Prism Patch Manager turns a time-consuming task into an automated process so you can do the job in hours instead of days.
- **Robust Reporting**—Prism Patch Manager gives you full insight into the state of the patches on your network. Reporting features let you generate and view reports on compliance status and trending.
- **Automated Patch Compliance**—Prism Patch Manager patches software to the compliance baseline that you define for improved process control and standardization, and automatically maintains patch levels to support ongoing compliance.

Eliminate vulnerabilities. Comply with requirements. Protect your organization. Automatically.

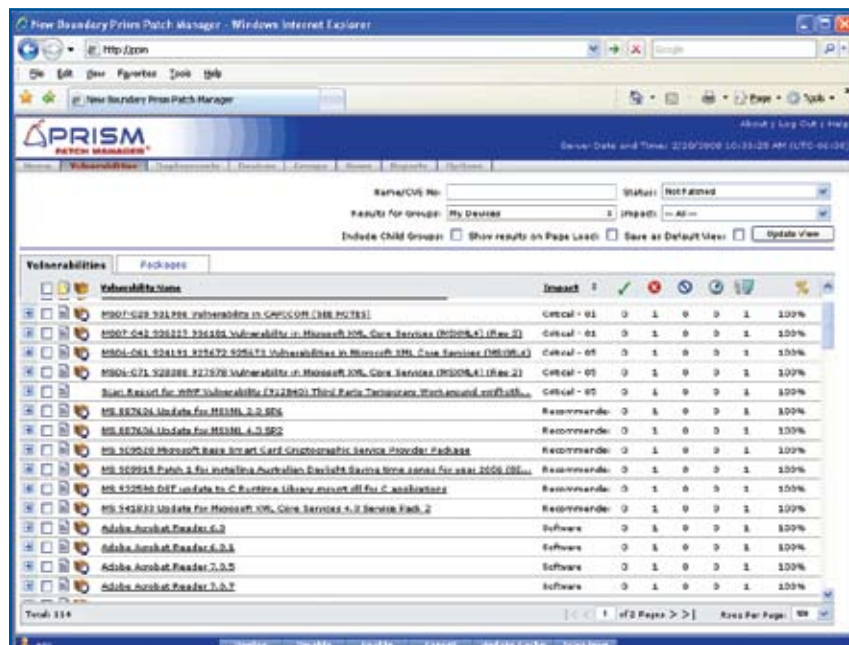

Prism Patch Manager® 6.4 delivers proactive Windows security.

Quickly and accurately compile a comprehensive, centralized view of software vulnerabilities on your Windows systems with thorough agent-based scans. Use an intelligent patch deployment wizard to quickly install any of more than 15,000 patches in one of the world's largest patch repositories. Continuously monitor and report on the threat and patch status

of each managed system, with automated email alerts and notifications.

Address operational, management, and compliance reporting needs with comprehensive reports that document vulnerabilities, patch deployments, patch status, and more. And

do it all in an evolving compliance landscape without breaking your budget or overextending your staff. Get Prism Patch Manager 6.4 – and get ahead of your compliance challenges today.

The Prism Patch Manager console provides a central location for assessment, administration and reporting.
