

Don't let software packaging slow you down.

Powerful software packaging made easy. Package software for deployment to every desktop and laptop in your organization — quickly, easily and reliably. Prism Deploy® Packager is simply the best software packaging product on the market — and we continue to improve it.

New and advanced features in Prism Deploy Packager:

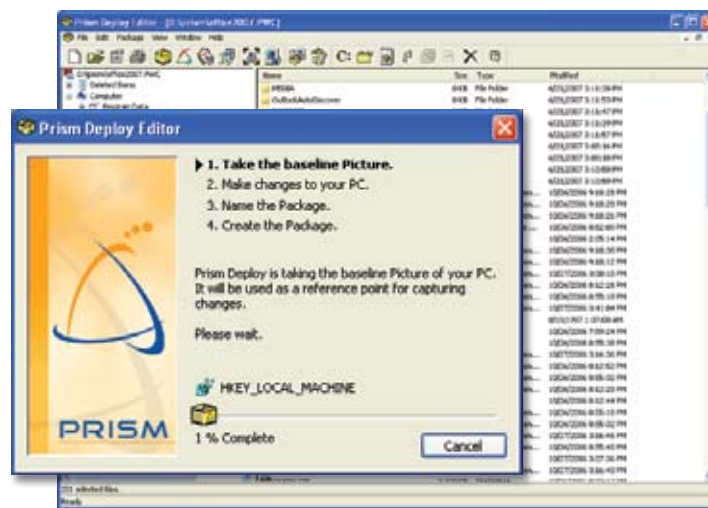

- **64-Bit Packaging** – Prism Deploy Packager packages all 64-bit software, including CAD and other large, complex applications, for fast, efficient deployment.
- **Windows Vista™ Support** – Prism Deploy Packager works effortlessly with Windows Vista and other Windows operating systems, making it the perfect packaging solution for mixed Windows environments.
- **Faster Windows Deployment** – Using innovative packaging and deployment technologies, Prism Deploy packager creates software packages that install on Windows Vista™ and other Windows systems up to five times faster than native installations.
- **Package Authentication** – Digital certificate support ensures that only packages from trusted sources get installed.
- **Permissions Packaging** – Allows administrators to capture, edit and deploy NTFS file permissions in software packages.
- **Checkpoint Restart** – Continue interrupted installs at the point the interruption occurred to save network bandwidth and IT resources.
- **Package Rollback** – Uninstall packages and return systems to their exact pre-deployment configuration.
- **Conflict Checker** – Eliminate software and configuration conflicts before rollout to greatly improve deployment efficiency and reliability.
- **Installation Rules** – Target packages for deployment based on software versions and system configuration traits.
- **Faster Windows Vista Deployments** – Using state-of-the-art technology, Prism Deploy Packager creates software packages that install on Windows Vista™ systems up to five times faster than native installations.
- **Prism Deploy Package Expert** – Replace tedious scripting with an innovative wizard packaging interface to slash package production times.
- **Smart Variables** – Build one software package, then customize it for deployment in a mixed network environment.
- **Legacy Application Support** – With full support for legacy applications, Prism Deploy Packager packages anything you need to deploy across your network.
- **Flexible Architecture** – Prism Deploy Packager integrates with Microsoft SMS and works with other desktop management suites to extend your existing technology investments.
- **Unparalleled Reliability** – Customer feedback shows Prism packages are close to 100 percent reliable when installing software and updating computer systems.

Slash software package cycle times and experience the most secure, reliable software packaging ever.

Get Prism Deploy® Packager.

Whether you use Microsoft® SMS, Microsoft® System Center, or another desktop management suite, your software packaging can use a boost. Prism Deploy Packager is the perfect complementary packaging tool for your existing deployment environment. Prism Deploy Packager helps you slash package production cycles from days or weeks to hours or minutes by replacing scripting with an easy wizard package creation interface.

You can easily view, edit and customize a Package in a familiar Windows Explorer-like interface. Gone are the days of tedious scripting.

The Package-building wizard builds deployment packages for you.

With Prism Deploy Packager, you can experience 100 percent reliable deployments with features like conflict checking and package authentication. Prism Deploy Packager gives you the flexibility to manage packaging for complex environments. Use Smart Variables to build a single package that can be customized for systems with varied configurations. Prism Deploy Packager can package anything for deployment over your network, from legacy applications to NTFS permissions and printer installs. Prism Deploy Packager can even help you remove risky, unauthorized software from your network. Give your software packaging a boost, and watch your efficiency and reliability soar.

You need **Prism Deploy® Packager**.
